KART Application for Paratransit Service

What is Paratransit?

Paratransit is an alternative, origin to destination, advance reservation required shared-ride public transportation service for any trip purpose within the designated service area and during the same days and hours as the fixed route bus service. It is designed to "mirror" the KART fixed-route service in terms of available times and areas.

Curb-to-curb and "mirroring" provisions of ADA mean that NO assistance is provided to individuals between the door of their starting point or destination and the Paratransit vehicle. Assistance is provided ONLY to help board and exit vehicles (i.e. wheel chair lift). In addition, Paratransit is required to provide service only if both the starting point and the destination of a trip are located within 3/4 mile of a KART fixed route during hours when that route is operating.

Who Qualifies for Paratransit?

Paratransit service is designed to serve ONLY those persons whose severity of disability prevents them from using public transportation. *Under the Americans with Disabilities Act (ADA), disability or age does not automatically qualify a person to ride Paratransit.* A person must be <u>FUNCTIONALLY</u> unable to use the fixed-route KART service. A person simply being reluctant to use the fixed route because they think it is inconvenient is not a consideration in determining paratransit eligibility.

Persons with disabilities may be considered eligible to use KART ADA service if they meet the following criteria:

- > If the person's disability prevents him/her from getting to and from a station/stop at the point of origin or destination.
- > If the persons disability prevents him/her from boarding, utilizing or disembarking from the vehicle at the station/stop, even with the assistance of a lift-equipped bus.
- > If the person's disability prevents him or her from recognizing the pick-up point or the destination point once the person is on the vehicle.
- > If the person's disability would not allow the person to negotiate transfers or connections if any should exist, on the desired fixed-route path of travel.

Architectural or environmental barriers not under the control of KART, (e.g. distance, terrain, lack of curb cuts, weather) standing alone, do not form a basis for eligibility. The interaction of such barriers with an individual's specific impairment-related condition may form a basis for eligibility, if the effect is to prevent the individual from traveling to a boarding location or from a disembarking location.

The following examples are provided as a <u>guideline only</u> to help in the determination of the type of ADA eligibility certification/recertification.

<u>Permanent Eligibility:</u> Any impairment which would cause the individual to become disorientated, confused, or otherwise incapable of navigating without the assistance of another person, and/or inability to physically reach a fixed boarding/disembarking location, or to physically board/disembark from a regular fixed-route bus which is otherwise accessible.

<u>Temporary Eligibility</u>: <u>Any Temporary</u> impairment (for a specific period of time renders the person disabled) which would cause the individual to become disorientated, confused or otherwise incapable of navigating without the assistance of another person, and/or inability to physically reach fixed boarding/disembarking location, or to physically board/disembark from a regular fixed-route bus which is otherwise accessible.

Conditional Eligibility: Any impairment that, depending upon environmental conditions, terrain, vehicle accessibility, and/or facility accessibility, and/or facility accessibility, and/or facility accessibility, makes It impossible for the individual to independently board/disembark from any fixed-route Location. (This category is distinguished from the first category in that, the degree of disability of individuals in the first category prohibits from using the fixed-route system. while individuals in this category can use the fixed-route system within certain Parameters)

ADA Eligibility Objective:

- Eligibility is not based on the disability, but rather the functional inability of a disabled person using the fixed route service.
- To determine when and under what circumstances an individual can and cannot use the fixed route service.
- Paratransit eligibility is not based on a medical decision.
- Objectively identify functional ability.

AUTHORIZATION FOR RELEASE OF MEDICAL RECORDS

(MUST BE COMPLETED BY APPLICANT)

Disability verification by qualified professional does not guaranteed eligibility for paratransit transportation, but **it** <u>can</u> play a major role in the eligibility determination process. While verification by <u>a Physician</u> is not required, it is important that any professional that verifies an individual's disability be familiar not only with the person's particular disability, but also with his/her ability or inability to travel on KART's fixed route system.

Statement of Release

I, the undersigned, understand that the medical information requested is confidential and will not be shared with any other person or agency, with the possible exception of another transit provider or transportation program to facilitate travel. I authorize the release of any and all medical records and/or information by the professionals listed below to KART for the express purpose of determining my eligibility for paratransit transportation.

Qualified Professionals

Note: Only the following professionals are authorized to verify your disability: Family Physician, physical therapist, occupational therapist, O & M specialist, therapist, rehabilitation specialist, licensed social worker, registered nurse, ophthalmologist, psychiatrist, and case manager.
